Smoke/Carbon Dioxide (CO) Detectors / Fire Door / Fire Extinguisher Requirements

1.) SMOKE DETECTORS SHALL BE LOCATED:

- If constructed prior to 1977 - on each level of dwelling and within 10 feet of sleeping areas. Detectors may be battery powered provided they utilize a 10-year sealed battery.
- If constructed between 1977 and 1983 - 110V Smoke Detector in the basement, and within 10 feet of all sleeping rooms. No interconnection or battery back-up required; however, battery backup is strongly recommended. Battery operated smoke detection is required on all other levels and shall utilize only 10-year sealed battery detectors.
- If constructed between 1984 and 1989 - 110V Smoke Detector on each level of dwelling, and within 10 feet of all sleeping rooms. All smoke detectors shall be interconnected. Battery back-up is not required but is strongly recommended.
- If constructed between 1990 and 1992 - 110V Smoke Detector with battery back-up located on each level of the structure, inside of each sleeping room, and within 10 feet outside of sleeping rooms. All smoke detectors shall be interconnected. Battery back-up is required unless the building is fully sprinklered. Nevertheless, battery back-up is strongly recommended.
- If constructed between 1993 and 1999 - 110V Smoke Detectors with battery back-up located on each level of the structure, inside of each sleeping room, and within 10 feet outside of sleeping rooms. All smoke detectors are to be interconnected. Smoke detection is not required in bedrooms if building is fully sprinklered. Battery back-up is not required if the building is fully sprinklered. Nevertheless, battery back-up is strongly recommended.
- If constructed between 2000 and present - 110V Smoke Detectors with battery back-up located on each level of the structure, inside all sleeping rooms, and within 10 feet outside of sleeping rooms. All smoke detectors are to be interconnected. (Note: There are no battery back-up exemptions for a fully sprinklered building.)

Borough of Little Ferry

215-217 LIBERTY STREET • LITTLE FERRY, NJ 07643
201-641-9234 201-641-1957 FAX
www.littleferrynj.org

1. All Smoke Detectors with a manufacture date greater than 10 years must be replaced.
 - **Detector Date of Manufacture (located on back of detector):** _____
 - All battery-operated smoke detectors shall be of the 10-year sealed battery type.
 - Smoke Detectors shall be installed securely at the highest point of the ceiling or, for level ceilings, may be installed on a wall between 4 and 12 inches below the ceiling.
 - Smoke Detector operation shall be tested monthly. Backup batteries in 110V detectors shall be changed once a year to assure proper operation.

2. CARBON MONOXIDE DETECTORS SHALL BE LOCATED:
 - Within 10 Feet of all sleeping areas.
 - On every level of the dwelling.
 - Immediately outside of any room containing a fuel-burning appliance.
 - In close proximity to the entrance of an attached garage.

Notes:

All Carbon Monoxide Detectors with a manufacture date greater than 5 years shall be replaced unless the manufacturer's literature allows for a longer period. In that case, submit the manufacturer's literature with this affidavit.

Detector Date of Manufacture (located on back of detector): _____

Carbon monoxide detection that is part of a combination smoke/carbon monoxide detector with a 10-year sealed battery is good for 10 years from date of manufacture.

3. APARTMENT ENTRY DOORS:
 - All doors separating dwelling units from common hallways shall be self-closing and self-latching. Check operation by opening the door halfway and verifying that the door fully closes and latches on its own.
 - Double-keyed cylinder deadbolt locks are prohibited on egress doors.

4. FIRE EXTINGUISHERS:
 - One- and two- family homes and where applicable some garden-style apartment complexes shall have an approved listed-type ABC fire extinguisher with a minimum rating of 2A:10B:C within 10 feet of the kitchen.
 - The extinguisher shall be mounted using the manufacturer's hanging bracket with the top of the extinguisher not more than five (5) feet above the floor and readily accessible and not obstructed.

Application for Certificate of Compliance (CCO)

Addendum for Lead-Based Paint Hazards
New Jersey Public Law 2021, c.182

*** Complete this form ONLY if the YEAR BUILT for the premises is prior to 1978 ***

PROPERTY ADDRESS: _____

1. Has the property/dwelling been previously certified to be free of lead-based paint pursuant to N.J.A.C. 5:17-3.6(b) either after an abatement was completed or an evaluation confirmed there is no lead-based paint in the dwelling?
YES _____ NO _____

If YES, submit a certification form from a certified lead evaluation firm.

2. FOR MULTIPLE DWELLINGS ONLY (3 or more dwelling units): Has the property been registered with the Department of Community Affairs for at least 10 years with no outstanding paint violations from the most recent cyclical inspection performed pursuant to N.J.S.A. 55:13A-1? YES _____ NO _____

If YES, the information will be verified by Little Ferry Code Enforcement.

3. Has the property/dwelling been issued a valid lead-safe certificate issued pursuant to P.L. 2021, c.182? Lead-safe certificates are valid for two years from the date of issuance.

YES _____ NO _____

If YES, submit the valid lead-safe certificate.

If you have answered NO to all the questions above or are unable to provide valid documentation, a Lead-Based Paint Hazard (LPH) inspection must be performed.

The Little Ferry Code Enforcement will conduct the LPH inspection; however, in accordance with P.L. 2021, c.182, the owner/landlord may directly hire an NJ certified lead evaluation contractor.

CHOOSE ONE OF THE FOLLOWING:

_____ I opt to have the required LPH inspection performed by the Little Ferry Code enforcement inspector. The fee for this inspection is \$150 (in addition to the fee for the COC).

_____ I opt to directly hire an NJ certified lead evaluation contractor and will provide a lead-safe certificate to the Little Ferry Building Department. A 15% administrative fee will be charged for choosing this option.

PURSUANT TO N.J.S.A 46:8-27 thru 37

One and two-unit dwelling registration form

- (a) The form of the certificate of registration to be filed with the municipal clerk and distributed to tenants by owners of non-owner occupied one and two unit dwellings shall be substantially as follows.

1. The names, addresses and phone numbers of all record owners of the building or of the rental business (including all general partners in the case of a partnership) are as follows:

2. If the record owner is a corporation, the names and addresses of the registered agent and of the corporate officers are:

Record owner is not a corporation.

3. If the address of any record owner is not located in the county in which the dwelling is located, the name and address of a person who resides in the county and is authorized to accept notices from a tenant, to issue receipts for those notices and to accept service of process on behalf of the out-of-county record owner(s) are as follows:

The addresses of all record owners in the county in which the dwelling is located:

4. The name and addresses of the managing agent are as follows:

There is NO managing agent.

5. The names and address (including dwelling unit, apartment or room number) of the superintendent, janitor, custodian or other person employed to provide regular maintenance service are as follows:

There is no superintendent, janitor, custodian or other person employed to provided regular maintenance service.

6. The name, address and telephone number of an individual representative of the record owner or managing agent who may be reached or contacted at any time in the event of an emergency affecting the dwelling or any dwelling unit, including such emergencies as the failure of any essential service or system, and who has authority to make emergency decisions concerning the building, including the making of repairs and expenditures are as follows: ***Must be different from #1**

Name: _____

Address; _____

Phone #: _____

7. The names and addresses of all holders of recorded mortgages on the property are as follows:

There is no recorded mortgage on the property.

8. If fuel oil is used to heat the building and the landlord furnishes the heat, the name and address of the fuel oil dealer servicing the building and the grade of fuel oil used are as follows:

Dealer Name: _____

Dealer Address: _____

Oil Grade: _____

The building is not heated by fuel oil.

The building is heated by fuel oil, but the landlord does not supply heat.

WHERE TO LOCATE DETECTORS:

Detectors are to be located on every level of a residence, (basement, first floor, second floor) excluding crawl spaces and unfinished attics, and in every separate sleeping area, between sleeping areas and living areas such as the kitchen, garage, basement or utility room. In homes with only one sleeping area on one floor, a detector is to be placed in the hallway outside the bedrooms as shown in: Figure 1. In single floor homes with two separate sleeping areas, two detectors are required, outside each sleeping area as shown in Figure 2. In multi-level homes, detectors are to be located outside sleeping areas and at every finished level of the homes as shown in Figure 3. Basement level detectors are to be located in close proximity to the bottom of basement stairwells as shown in Figure 4.

WHERE NOT TO LOCATE DETECTORS

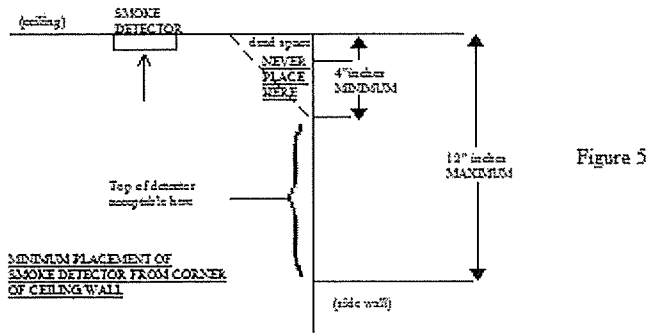

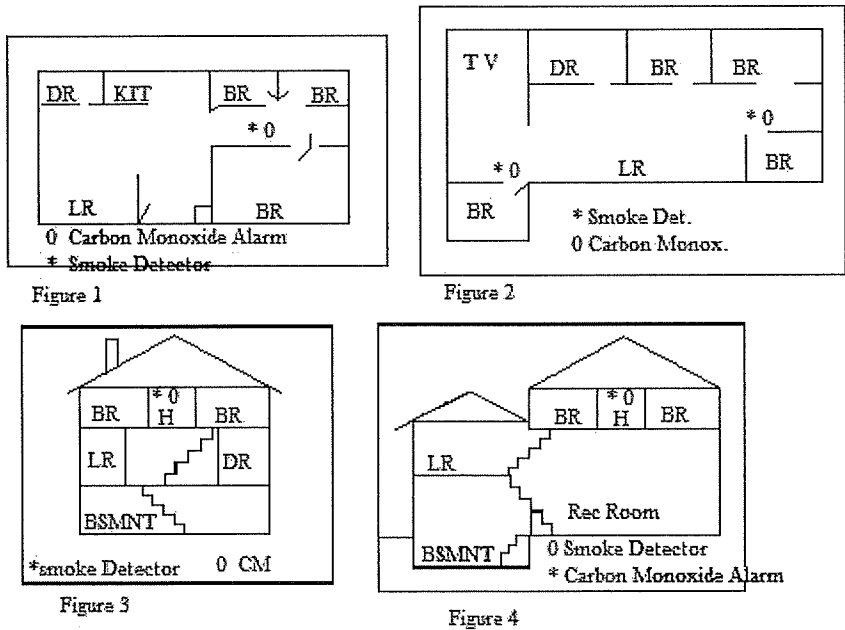

To avoid false alarms and/or improper operation, avoid installation of smoke detectors in the following areas:

- Kitchens-smoke from cooking may cause a nuisance alarm.
- Bathrooms-excessive steam from a shower may cause a nuisance alarm.
- Heat forced air ducts-used for heating or air-movement may prevent smoke from reaching detector.
- The 4-inch "Dead Air" space where the ceiling meets the wall, as shown in Figure 5.
- The peak of an "A" frame type of ceiling-"Dead Air" at the top may prevent smoke from reaching detector.

FURTHER INFORMATION ON DETECTOR PLACEMENT:

For further information about smoke detector placement consult the National Protection Association's Standard No. 74-1984, titled "Household Fire Warning Equipment". For Carbon Monoxide alarms, their publication is Recommended Practice #720. These publications may be obtained by writing to the Publication Sales Department National Fire Protection Association, Batterymarch Park, Quincy MA 02269.

Carbon monoxide alarms are to be located in every separate sleeping area per NFPA 720 and manufacturer's recommendations.

An Ounce of Prevention

Here are some steps you can take to protect yourself and your family:

- Have home furnaces and heating systems professionally inspected annually.
- Have the chimney and flue cleaned professionally.
- Open flues when fireplaces are in use
- Use proper fuel in kerosene space heaters.
- Make sure burner flames on furnaces and stoves are blue – not yellow-orange.
- Ensure that appliances such as gas dryers are properly vented.
- Never run an automobile in an attached garage or a gas engine in any enclosed space.
- Discourage or prohibit smoking indoors.
- Consider installing a carbon monoxide detector that meets the amended UL (Underwriters Laboratories) standard 2034, effective October 1, 1995. (Underwriters Laboratories has a set standard (UL 2034) that calls for a detector to sound the alarm before a person would experience a blood concentration of 10% carboxyhemoglobin. Cigarette smoking typically causes a level of about 9%.)

If you suffer from dizziness, nausea, fatigue, and headaches while you are home and feel better when you go out you may have CO poisoning. See a doctor and get a carboxyhemoglobin test to determine the percentage of carbon monoxide in your blood.

If you would like more information, there are several consumer hotlines established to address CO questions:

- The American Sensor's *Healthy Home* Hotline (800/387-4291)
- Local chapters of the American Lung Association (800/LUNG-USA)
- The Consumer Product Safety Commission (800/638-CPSC)

Information provided by American Sensors, the American Lung Association,
and the national Association of Counties
